Divyanshu Bansal

+91 88246 99563 | divyanshubansal323@gmail.com | LinkedIn | GitHub

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, Java, SQL (PostgreSQL), C++
Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, WebSockets, NextAuth v5, Prisma ORM
Databases & Infrastructure: PostgreSQL (Neon.tech), MongoDB, Redis (Upstash), Docker, CI/CD, Google Cloud Platform
Automation & Scraping: Playwright, TF-IDF scoring, PDF parsing (pdfplumber), web automation pipelines
AI/ML & Tools: TensorFlow, pandas, NumPy, LLM APIs (Claude, OpenAI), RAG pipelines, Git, Postman, VS Code

Experience

Benciti Technology Ltd. June 2024 – July 2024
Research & Development Intern · Bengaluru, India

- Debugged and integrated REST APIs across backend systems, coordinating with engineers to resolve database performance bottlenecks and ensure stable system behavior under load.
- Contributed to backend testing pipelines and UI/UX debugging for the Nudge app, identifying and fixing edge cases across API response flows.
- Participated in Agile sprint cycles, communicating blockers proactively and iterating on solutions based on team feedback.

Projects

TradeFlow · Next.js 14, Node.js, PostgreSQL, Prisma, WebSockets, NextAuth v5, Zustand 2026

- Built a full-stack real-time paper trading platform from scratch — designed backend APIs, WebSocket event system for live price streaming, and session-based authentication with NextAuth v5.
- Architected PostgreSQL schema using Prisma ORM for users, portfolios, positions, and trade history; implemented transactional trade execution logic to maintain data consistency under concurrent operations.
- Integrated Upstash Redis for rate limiting and Sentry for error monitoring; structured the codebase for SaaS extension with Stripe billing and Resend email pipelines.

Automated Job Application Agent · Python, Playwright, pdfplumber, TF-IDF 2025

- Built a fully local web automation agent targeting Internshala — scraped job listings, parsed resume data from PDF using pdfplumber, and ranked job-resume fit using TF-IDF scoring.
- Implemented Playwright-based browser automation to navigate dynamic pages, handle login flows, and auto-fill application forms — handling edge cases in page state and selector reliability.
- Designed the pipeline to be modular and extensible, with clear separation between scraping, scoring, and form submission layers.

PromptGenie — Chrome Extension · Manifest V3, JavaScript, Claude API 2026

- Built and shipped a Manifest V3 Chrome extension that intercepts user prompts and enhances them via the Claude API before submission — handling background service workers, content scripts, and async API calls.
- Managed cross-origin API communication, message passing between extension layers, and graceful error handling for API failures and rate limits.

MERN Stack E-commerce Platform · React.js, Node.js, Express.js, MongoDB, JWT 2025

- Built RESTful API backend with JWT authentication, admin dashboard with real-time inventory management, and optimized MongoDB schemas for scalable product/order management.

Achievements & Certifications

- Solved 500+ DSA problems across LeetCode and other platforms, with strong foundation in arrays, trees, graphs, and dynamic programming.
- Completed AI for Everyone (DeepLearning.AI); studied LLM architecture end-to-end including tokenization, RoPE, GQA, SwiGLU, RAG pipelines, and agent frameworks.
- Enrolled in Harkirat Singh's 100xDevs cohort — full-stack and systems-focused curriculum.

Education

BML Munjal University 2022 – 2026
B.Tech in Computer Science Engineering · CGPA: 7.82/10 · Gurugram, Haryana
